myMiami New Feature
Functional Requirements

Feature: Run/View DARS report
Location: As part of My Courses module
Author: Kent Covert
Date: 10/4/2005

Summary
Students can currently run and view DARS reports from within BannerWeb. Users have requested to add this feature to myMiami. The Portal Features sub-team has determined that adding this as a link to the My Courses module (for students only) is the best option. Clicking on this link will take the user to the Banner screen that allows users to submit and then view their DARS report. Better integration should be investigated as part of the Banner 7/DARS upgrade project.

New Feature Description
A link should be added to the end of the My Courses module that takes the user to the Banner screen where they can run and view DARS reports.

A mockup of the My Courses module with this link included is provided at the right.

The DARS link should only be displayed for students. The link should open the Banner screen in a new window. The DARS URL in Banner is:

A screen shot of the DARS screen to be displayed is provided at the right.

**Additional Items**

The DARS interface in Banner will probably be going through significant changes with the move to Banner 7. Re-evaluation of the feature proposed here should be considered as part of that upgrade.
